EDUCATION

Pondicherry University
B.Tech + MBA — Computer Science & Business Systems (CSBS)
2025 – 2030

- Semester 1 SGPA: 9.23 / 10.0
- Semester 2 SGPA: 9.25/10.0
- Mathematics: 100/100 intermediate · Linear Algebra: 99/100
- Engineering Mathematics: 95/100 · Basic Electronics: 90/100
- JEE Advanced: Qualified — 2 times(2024-25)

Senior Secondary (BSEB): 84.6%
Secondary (CBSE): 84.8%

SKILLS

Programming Languages

- Python (Advanced)
- C/c++
- HTML / CSS
- Node js-learning

Core Competencies

- Behavioral Biometrics & Fraud Analytics
- Financial Accounting (Journal & Ledger)
- Digital Financial Transformation
- Business Communication
- Linear Algebra & Engineering Mathematics

Tools & Platforms

- VS Code
- Pygame
- MS PowerPoint
- Ms word
- Antigravity

LANGUAGES

- English — Professional
- Hindi — Native
- Tamil-little bit

PROFILE SUMMARY

B.Tech + MBA (Computer Science & Business Systems) student at Pondicherry University (Semester 2 CGPA: 9.25/10) with a dual foundation in software engineering and financial/business systems. Built and presented an AI-driven behavioral-biometrics framework for digital-banking fraud mitigation, and modeled AI-powered financial-transformation strategies that connect accounting fundamentals with automated systems. Two-time JEE Advanced qualifier with a perfect 100/100 in Mathematics in intermediate. Seeking an AI/FinTech Analyst internship to apply technically grounded, data-driven thinking to real financial systems.

PROJECTS

RENOPAY

A full-stack UPI payments app built end-to-end — real-time transfers, UPI Lite, SentinAI fraud detection, shared vaults, savings goals, and an AI-powered bookkeeping module with double-entry ledger logic. Deployed live with Docker + Nginx on Render.

Project SENTINAI | Behavioral Biometrics for Digital Banking Security

- Designed and built a keystroke-dynamics framework that continuously verifies user identity from typing behavior — addressing the fraud risk of password-only authentication.
- Presented the AI-driven fraud-mitigation framework at a competitive ideathon, pitching a technical security solution to a judged panel.

InnovateX | AI-Powered Financial Transformation for Next-Gen Banking

- Proposed an AI-powered financial-transformation strategy to modernize legacy banking, integrating accounting logic (journal & ledger principles) with automated workflows.
- Delivered a strategy framework bridging technical system design directly to business and accounting fundamentals — connecting engineering with finance.

Treasure Hunter | 2D Game Engineering in Python & Pygame

- Built a 2D game from the ground up, engineering custom collision-detection logic and a multi-state game-management system.
- Reinforced core programming fundamentals — state machines, object interaction, and real-time logic — directly transferable to backend and analytical system design.

Additional Projects

- NemEdico** — healthcare platform concept linking patients, doctors, and medical stores.
- Habit Tracker** — productivity app for building consistent daily habits.
- EklavyaX** — gaming-based learning platform for interactive, engaging education.
- MAHAN** — connects experienced/retired professionals with relevant work opportunities.

ACHIEVEMENTS & LEADERSHIP

- Ideathon Presenter:** Presented Project SENTINAI's fraud-mitigation framework to a judged panel as a business-relevant proposal.
- JEE Advanced (2× Qualifier):** Qualified twice and scored a perfect 100/100 in Mathematics — sustained rigor under national-level pressure.
- Pragyan, NIT Trichy:** Participated in one of India's leading student-run technical festivals, engaging with peer innovators nationwide.
- Digital & Financial Literacy:** Completed multiple national Government of India digital-literacy quizzes, reinforcing fundamentals directly relevant to fintech.
